## Front-end Developer

Dedicated Front-end Developer with over 25 successful projects, passionate about crafting responsive and user-friendly web applications. Expertise includes Web Development, Web Design, and creating visually appealing, functional digital experiences. Utilizes modern technologies such as React, Tailwind CSS, HTML, and CSS, ensuring high-quality code and design in every project. Committed to understanding clients' unique needs and delivering customized solutions that drive growth and success for their businesses.

## WORK EXPERIENCE

### Upwork

Sep 2024 - Present

#### Frontend Developer • Freelancer

### National Telecommunication Institute - المعهد القومي للاتصالات

Sep 2024 - Oct 2024

#### Web Designer • Internship

- Collaborated with a diverse team on various projects, gaining hands-on experience with modern web technologies. Focused on creating responsive, visually appealing websites while improving soft skills like communication, teamwork, and problem-solving during the final week of training.

### Information Technology Institute (ITI)

Sep 2024 - Sep 2024

#### React Developer • Internship

- Developed dynamic, user-friendly applications using React, with a focus on reusable components and efficient state management. Gained hands-on experience in advanced concepts like custom hooks and Redux Thunk.

### Mindset Training

Aug 2024 - Sep 2024

#### ReactJS Training • Internship

- Mindset Training Internship
- Worked on practical projects under the guidance of a senior professional, gaining experience with advanced technologies like Redux, Custom Hooks, React Query, Tailwind CSS, and Vite.
- Collaborated on a team graduation project, improving my teamwork and coordination skills.
- Developed strong research skills, enabling me to discover new technologies and improve my self-learning and problem-solving abilities.
- Gained expertise in structuring projects, organizing files, and writing clean, responsive code.
- Learned professional tricks, such as efficiently handling Vite, which significantly enhanced my development workflow.

**Meta**

**Aug 2023 – Aug 2024**

**Android Developer Professional Certificate – Scholarship from MBRF, UNDP**

- Gained advanced skills in Android app development, focusing on UI design, data management, security, and app testing.
- Taught by Meta experts, providing insights into market demands and career opportunities in Android development.

**Information Technology Institute (ITI)**

**Jul 2024 – Jul 2024**

**MEARN Stack Development • Internship**

**EDUCATION**

**Bachelor of Science in Computer Science**

Beni-Suef University

Jan 2020 – Dec 2024

**PROJECTS**

**Florenza**

National Telecommunication Institute – المعهد القومي للاتصالات

An eCommerce platform for flowers and scented candles featuring user accounts, organized product categories, and responsive design, built with HTML, CSS, and JavaScript, utilizing Local Storage and JSON for data management.

**CLICON**

Mindset Training

An eCommerce platform similar to Amazon, enabling users to browse products, manage their cart, and track orders with features like user authentication, category filtering, and cart persistence. Users can explore a wide range of products, add items to their cart, and update quantities seamlessly.

**Done-it**

Mindset Training

A simple and efficient task management app built with React (Vite), Context API, and Tailwind CSS. Users can create, mark, and delete tasks, track their progress with a task counter, and enjoy task preservation through LocalStorage for seamless sessions.

**New Movie**

Information Technology Institute (ITI)

A web application for discovering and exploring movies with an intuitive interface to browse popular films and view detailed information.

**Rivo**

Information Technology Institute (ITI)

A web application for discovering stylish clothing and accessories, featuring a high-performance frontend with React and Vite, Tailwind CSS for flexible styling, responsive design for all devices, and clean, organized code.

**XnO**

Mindset Training

A professional project built with React, Vite, and Tailwind CSS, featuring dynamic gameplay, real-time updates, a scoring system, and a winning combination display. Key features include a responsive UI, current player turn indication, and score storage in LocalStorage. Technologies used: React (Vite), Context API, and Tailwind CSS.

## Egypt ID

Mindset Training

A web application that allows users to input their Egyptian national ID number to extract information such as city, date of birth, and gender. Features include city extraction, date of birth retrieval, gender identification, and a user-friendly interface for seamless data entry and retrieval.

## Little Lemon

Meta

Developed as part of the Meta Android Professional Certification, this app for a fictional restaurant showcases skills in Android development, including UI design and data persistence.

## MAIZ

Mindset Training

A modern, fully responsive website for a Saudi cuisine restaurant, providing an immersive experience of authentic flavors and cultural richness through a sleek and luxurious design.

## BOARD

A sleek, immersive frontend project showcasing a futuristic gaming experience, built in under 5 hours as part of a self-training exercise. Utilizes React, Vite, and Tailwind CSS to ensure clean, responsive design and organized code.
